Therabeat, Inc Mission and Philosophy

Kindermusik is a classroom learning experience. We teach children music so they can become better learners. It's not about making little Mozarts. It's about developing skills in the whole child—ages newborn to 7 years—cognitive, physical, social, emotional, language and musical. For more than 25 years, we have believed music is the best conductor for learning. Today music and the mind research is known as the "most rapidly developing field of human study," according to recent reports from the Royal Institute of Great Britain.

Children exposed to the arts for three hours on three days a week through one full year are:

- * 4 times more likely to participate in a math and science fair
- * 3 times more likely to win an award for school attendance
- * 4 times more likely to win an award for writing an essay or a poem
- * 4 times more likely to be recognized for academic achievement
- * 3 times more likely to be elected to class office within their schools

We're the "General Motors" of childhood development. The Wall Street Journal says Kindermusik is the "General Motors" of childhood development. We like to say it's the single best choice for your child. New information is gathered from experts around the world in a variety of music and child development studies. We collect this information and translate it into the Kindermusik learning experience. So everything we make—bed-time storybooks, music CDs, and instruments—contains a world of learning.

We believe parents are the best educators. As your child grows, Kindermusik understands the development process taking place. We also want you to understand that process, because when a child's learning needs are best understood in the classroom and at home, Kindermusik can foster all aspects of a child's development while developing a natural sense of musical appreciation and capability.

There will be a limit of 10 children per class to ensure the most nurturing and supportive learning environment for your child.
